PROFESSIONAL SUMMARY

AI Engineer with 3 years of experience in Generative AI, Agentic AI, Machine Learning, Large Language Models (LLMs), and intelligent automation. Skilled in designing, developing, and deploying AI-powered applications using Python, FastAPI, React, LangChain, LangGraph, RAG (Retrieval-Augmented Generation), Vector Databases, Prompt Engineering, and modern AI frameworks. Experienced in building scalable chatbot platforms, multiagent systems, AI workflows, backend APIs, and enterprise-grade AI solutions. Proficient in AI framework integration, workflow orchestration, conversational AI, and end-to-end application development. Strong analytical, problem-solving, and software engineering skills with a passion for learning emerging technologies, exploring innovative AI advancements, and delivering high-quality, production-ready solutions that improve business efficiency and user experience.

WORK EXPERIENCE

CSM Technologies Pvt Ltd | Bhubaneswar, Odisha || Hybrid
Duration: Jul 2025 – Present

- Worked with AI agents, conversational memory, and stateful workflows using LangChain and LangGraph.
- Developed QA Chatbots and conversational AI solutions using contextual retrieval and LLM-based response generation.
- Designed RAG pipelines involving document processing, text chunking, embeddings, retrieval, and context-aware response generation.
- Enhanced Generative AI and chatbot applications using LangChain, LangGraph, and LLMs.
- Built RAG-based solutions with vector databases for intelligent document retrieval and question answering.
- Designed AI-powered workflows and agent AI systems for business process automation.
- Developed scalable backend APIs using Python and FastAPI for AI applications.
- Researched and adopted new AI technologies to improve application capabilities and efficiency.

Zentron Labs Pvt Ltd | Bangalore, Karnataka || Hybrid
Duration: Jan 2022 – Feb 2024

- Collected, labeled, and analyzed fruit quality data based on physical characteristics and ripeness indicators to build datasets for Machine Learning model development.
- Improved and trained supervised Machine Learning models using Python and Scikit-learn for automated fruit ripeness classification and quality assessment.
- Performed data preprocessing, feature engineering, and model optimization to improve prediction accuracy and model reliability.
- Systematized data processing and reporting workflows using Python to support analysis, monitoring, and operational decision-making.
- Collaborated with Computer Vision teams to integrate Machine Learning models into real-time image processing and fruit inspection systems.
- Generated reports to support data-driven decision-making for product teams.

PROJECTS

AI-Powered Workflow Automation using LangGraph and LangChain with Chatbot UI Integration | 2026
https://github.com/BDheerajChandan/InHouse_Projects/tree/main/Agentic_AI_Workflow
Developed a modular AI workflow automation platform using LangChain and LangGraph with configurable workflows, state management, conditional routing, and tool calling. Implemented AI agent and multistep workflows for RAG, document processing, retrieval, validation, and automated task execution. Integrated a React-based chatbot UI with FastAPI backend APIs to enable conversational interaction and workflow execution. Used PostgreSQL for managing workflows, chatbot sessions, execution history, and results.

Retrieval-Augmented Generation (RAG) Question Answering System | 2026
https://github.com/BDheerajChandan/InHouse_Projects/tree/main/RAG_QA
Enhanced a Retrieval-Augmented Generation (RAG) based question answering system that processes documents from local directories, generates embeddings, and stores them in a vector database. Executed semantic search to retrieve relevant context and integrated Large Language Models (LLMs) to generate accurate, context-aware responses.

Agentic AI Travel Booking Assistant | 2026
https://github.com/BDheerajChandan/InHouse_Projects/tree/main/AI%20Agent%20-%20Project%201%20%2C%20Travel%20booking
Expanded an Agentic AI-based travel booking assistant that leverages Large Language Models (LLMs) and AI agents to understand user queries and automate travel-related tasks. Planned multistep reasoning workflows to handle itinerary planning, travel recommendations, and contextual decision-making using tool-integrated AI systems.

AI Driven AutoML Pipeline | 2025
https://github.com/BDheerajChandan/CollegeProjects/tree/main/InHouse%20Projects/ML-DL_SelfProjects/ML%20Model%20Build%20Automation
Engineered an systematized ML pipeline reducing model training time by 70%; evaluated 8+ algorithms with hyperparameter tuning using Python and Scikit-learn to select optimal models automatically.

Python Data Ingestion and SQL Automation | 2023

https://github.com/BDheerajChandan/CollegeProjects/tree/main/InHouse%20Projects/Python_SelfProjects/Database%20AutoCreation

Mechanized end-to-end data ingestion and SQL schema creation, cutting manual database setup time by 80% and processing 20+ external data sources using Python ETL pipelines.

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks & Libraries: FastAPI, React.js, Angular, LangChain, LangGraph

AI & ML: Machine Learning, Deep Learning, NLP, TF-IDF, Scikit-learn, Model Optimization

Generative AI: RAG, LLMs, Agentic AI, Prompt Engineering, AI Agents, Embeddings, Semantic Search, Vector Search, Conversational AI

Databases: MySQL, MongoDB, SQLite

Vector Databases: Milvus, FAISS, Chroma

Tools & Platforms: Git, Docker, Airflow, Linux, Tableau, Excel

Core Concepts: ETL Pipelines, Data Analysis, System Design, Data Structures

Spoken Languages: Telugu, English, Hindi, Odia

EDUCATION

PG-Diploma in Big Data Analytics (DBDA)

CDAC | Bangalore, Karnataka

Duration: Mar 2024 – Aug 2024

B.Tech in Electrical and Electronics Engineering

KIIT University | Bhubaneswar, Odisha

Duration: Jul 2018 – Jun 2022

Class XII (CBSE)

Sri Chaitanya Techno School | Visakhapatnam, Andhra Pradesh

Duration: 2016 – 2018

CERTIFICATIONS

Deep Learning and ChatGPT | Udemy | 2024

Java Programming | Coursera | 2021

Python Programming | KIIT University | 2021

Robotics and Embedded Systems | KIIT Robotics Society | 2020

ACHIEVEMENTS

- Accomplished 4-star rating in Java on HackerRank, placing in top 15% globally (2024)
- Achieved 3-star rating in Python on HackerRank, placing in top 20% globally (2024)
- Secured 4th rank out of 60+ candidates in CDAC PG-Diploma in Big Data Analytics
- Acquired 5th rank in Embedded Systems course among 80+ students at KIIT Robotics Society
- Ranked 1st in ICSE board at school level in Computer Applications (2016)
